

# Blocking Senders Reporting Spam / Phishing

This article describes how to block a specified sender or domain, as well as how to report spam or phishing to the Mimecast Security Team. The difference between the two actions is as follows:

- Block a sender's address or domain. This added the sender's address or domain to your personal blocked senders list
- Report the message as spam or phishing. This automatically triggers the following actions:
  - o The message is moved to your Junk E-Mail folder in Microsoft Outlook.
  - o The sender of the message is added to your Blocked Senders list.
  - o The message is forwarded to the Mimecast Security Team for analysis.

**Note: No notification is sent to the sender, if a message is blocked or reported for spam / phishing.**

## Block a Sender's Address / Domain

1. Select one or more messages.
2. Select the **Block Sender** drop-down.

3. Select **Block Sender** or **Block Domain**.

## Report Spam or Phishing

1. Select a Message.
2. Select the Report Message icon.
3. Select Report Spam or Report Phishing.

4. Click Report in the confirmation pop-up to report the email as spam or phishing.
